

# Table of Contents

<b>INTRODUCTION</b>	<b>i-1</b>
A brief description of the purpose of this document.	
<b>OVERVIEW</b>	<b>ii-1</b>
A broad overview of how AMS functions.	
<b>GETTING STARTED</b>	<b>iii-1</b>
An explanation of how to use the information contained in this document.	
<b>PROGRAM FLOW</b>	<b>iv-1</b>
Data flow diagrams displaying the program processing of AMS.	
<b>REQUIREMENTS</b>	<b>REQ-1</b>
A description of the participation requirements, the communications software and equipment necessary to interface with the U.S. Customs Service Data Center.	
<b>Respondent Checklist</b>	<b>REQ-1</b>
A description of the commitments and preparation necessary to begin communicating with the Customs Data Center.	
<b>Communications Technique and Protocol</b>	<b>REQ-3</b>
A description of the requirements for communications testing with the U.S. Customs Service Data Center.	
<b>Procurement of Equipment and Software</b>	<b>REQ-3</b>
A description of the hardware and software needs and interface requirements including contact information within the client's organization.	
<b>Pre-Test Requirements</b>	<b>REQ-4</b>
A description of password development and remote numbers.	
<b>Customs Pre-Test Responsibilities</b>	<b>REQ-4</b>
A description of U.S. Customs Service pre-test responsibilities to secure password information and assign a Communications Specialist to the client.	
<b>Communications Testing</b>	<b>REQ-4</b>
A brief description of communications testing procedures.	
<b>Data Encryption Information</b>	<b>REQ-4</b>
A brief description of data encryption information.	

**Theory of Operation** ..... **REQ-5**  
A description of the network configurations supported by the encryption systems.

**Remote Site** ..... **REQ-5**  
A description of the remote site data communication requirements, data encryption standards, and encryption system characteristics and ordering information.

**APPLICATION CONTROL** ..... **APL-1**  
Provides applications requirements, transaction file sequencing rules, and requirements for record data element formats.

**Transaction Control Records** ..... **APL-2**  
A description of the records necessary to begin and end manifest data exchanges.

**Transaction File Sequencing Rules** ..... **APL-3**  
A description of the order of records for a transaction file.

**Record Descriptions** ..... **APL-4**  
Provides a description of each data element contained in the required Transaction Control Header (ACR) and Transaction Control Trailer (ZCR) records.

**EQUIPMENT INVENTORY** ..... **EQU-1**  
Provides descriptions and format requirements for each data element contained within a transaction record created to transmit information on empty containers onboard a conveyance destined for discharge in U.S. or on empty containers laden onboard a conveyance during coastwise calls.

**Record Descriptions** ..... **EQU-4**  
Provides descriptions of data elements required for records used to transmit the container/equipment number and seal numbers on a conveyance.

**GENERAL ORDER STATUS** ..... **GOS-1**  
Provides descriptions and format requirements for each data element contained within a transaction record input by a carrier, port authority or service bureau to transmit bill status information to the U.S. Customs Service Data Center.

**Record Descriptions** ..... **GOS-4**  
Provides descriptions of data elements required for formatting AMS bill of lading status records.

**IN-BOND AND CONVEYANCE ARRIVAL MESSAGE** ..... **IBA-1**  
Provides descriptions and format requirements for each data element contained within a transaction record input by a carrier, port authority, or service bureau to transmit in-bond arrivals and actual conveyance arrival to the Customs Data Center.

**Record Descriptions** ..... **IBA-4**  
Provides descriptions of data elements required for formatting AMS in-bond and conveyance arrival records.

**INPUT TO CUSTOMS** \_\_\_\_\_ **INP-1**

Provides descriptions and format requirements for each data element contained within a transaction record input by a carrier, port authority, or service bureau to transmit data to the U.S. Customs Service Data Center.

**Generation of Status Notification Messages** ..... **INP-5**

A description of the generation of status notification messages.

**Record Descriptions** ..... **INP-6**

Provides descriptions of data elements required for formatting AMS input records.

**MANIFEST AMENDMENTS** \_\_\_\_\_ **MAD-1**

Provides description and format requirements for each data element contained within a transaction record input by a carrier, port authority, or service bureau to transmit manifest amendment data to the U.S. Customs Service Data Center.

**Record Descriptions** ..... **MAD-4**

Provides descriptions of data elements required for formatting AMS records.

**MANIFEST CONSIST** \_\_\_\_\_ **MFC-1**

Provides description and format requirements for each data element contained within a transaction record created to transmit manifest consist information to the U.S. Customs Service Data Center.

**Record Descriptions** ..... **MFC-3**

Provides a description of data elements required for formatting AMS manifest consist records.

**MANIFEST EDITS** \_\_\_\_\_ **MED-1**

Provides descriptions and format requirements for each data element contained within a transaction record input by a carrier, port authority or service bureau to transmit manifest edit data to the U.S. Customs Service Data Center.

**Record Descriptions** ..... **MED-3**

Provides descriptions of data elements required for formatting AMS manifest edit records.

**OUTPUT FROM CUSTOMS** \_\_\_\_\_ **OUT-1**

Provides descriptions and format requirements for each data element contained within a transaction record transmitted to a carrier, port authority, or service bureau by the U.S. Customs Service Data Center or other Federal agency indicating the current status of a bill of lading.

**Record Descriptions** ..... **OUT-3**

Provides descriptions of data elements required for formatting AMS output records.

**“PAPERLESS” MASTER IN-BOND PROGRAM** \_\_\_\_\_ **PMI-1**

Provides a description of the MIB program and MIB processing requirements.

**PERMIT TO TRANSFER** ..... **PTT-1**  
Provides a description and format requirements for each data element contained within a transaction record input by a carrier, port authority, or service bureau to transmit a permit to transfer request to the U.S. Customs Service Data Center.

**Record Descriptions** ..... **PTT-3**  
Provides descriptions of data elements required for formatting AMS permit to transfer records.

**SUBSEQUENT IN-BOND APPLICATION** ..... **SIA-1**  
Provides descriptions and format requirements for each data element contained within a transaction record created to transmit supplemental in-bond movement information without deleting or adding to an existing Bill of Lading record.

**Record Descriptions** ..... **SIA-4**  
Provides descriptions of data elements required for formatting AMS in-bond records.

**TRANSMISSION ACCEPTANCE/REJECTION** ..... **TAR-1**  
Provides descriptions and format requirements for each data element within a transaction record transmitted to a carrier, port authority, or service bureau from the U.S. Customs Service Data Center indicating acceptance or rejection of a transaction file transmission.

**Record Descriptions** ..... **TAR-3**  
Provides descriptions of data elements required for formatting AMS error transmission or cumulative result records.

**APPENDICIES** ..... **APP-1**  
Provide the supplementary material relevant to formatting and completing Automated Manifest records.

**APPENDIX A** ..... **A-1**  
Provides a listing of communications definitions to aid in establishing communications between the AMS user and the Customs Data Center.

**APPENDIX B** ..... **B-1**  
Provides a listing of communications specifications necessary for establishing communications between the AMS user and the Customs Data Center.

**APPENDIX C** ..... **C-1**  
Provides a complete listing of valid record data sets used to transmit data to and data from the Customs Data Center.

**APPENDIX D** ..... **D-1**  
Provides a complete listing of valid entry type codes.

**APPENDIX E** ..... **E-1**  
Provides a complete listing of valid amendment codes.

**APPENDIX F** ..... **F-1**  
Provides a complete listing of valid disposition codes.

**APPENDIX G** ..... **G-1**

Provides a complete listing of valid Customs district and port codes.

**APPENDIX H** ..... **H-1**  
Provides a complete listing of valid foreign port codes.

**APPENDIX I** ..... **I-1**  
Provides a complete listing of valid International Organization for Standardization (ISO) Country Codes.

**APPENDIX J** ..... **J-1**  
Provides a complete listing of error messages.

**APPENDIX K** ..... **K-1**  
Provides a complete listing of valid container/equipment codes.

**APPENDIX L** ..... **L-1**  
Provides a complete listing of export information codes.

**APPENDIX M** ..... **M-1**  
Provides a cross-reference of all data elements, record identifiers and chapters.

**GLOSSARY** ..... **GLO-1**  
Provides a listing of document-specific and ACS terminology.

***User Notes:***
