

User Statistics

User statistics are provided automatically to the Automated Commercial System (ACS) users on a monthly basis.

RECORD DESCRIPTION

Record Identifier O1/2/3 (Output).....

...UST-3

Mandatory user statistics output records that provide filers with entry summary volume and system performance statistics for each district/port for the previous month, current month, and fiscal year to date.

User Statistics

User statistics are provided for entry summaries presented at each U.S. Customs and Border Protection (CBP) district/port. For example, if a user submits entries for clients in Philadelphia and Baltimore, the user receives statistical records for both Philadelphia and Baltimore.

User statistics are accumulated and made available on the first working day of each month.

Input: There are no input records for user statistics.

Output: Record Identifier O1/2/3 is a mandatory user statistic record. This record is repeated three times. The first record contains the current month's statistics (record type code 1). The second record contains the previous month's statistics (record type code 2) and the third record contains fiscal year-to-date statistics (record type code 3).

The application identifier in Record Identifier B is OR. For additional information on Record Identifier B, refer to the Application Control chapter in this document.

Record Identifier 01/2/3 (Output)

This is a mandatory user statistics output record that provides each filer with entry summary volume and system performance statistics for each established filing port.

The data included reflects information for the current month, previous month and cumulative information for fiscal year to-date.

Statistics show total entry summary volumes filed with CBP, filed through ABI and a percentage of eligible ABI entry summaries filed as compared to the total entry summary volume eligible for ABI.

Also included is the total number of ABI entry summary transactions submitted through ABI. This figure includes entry summary add, delete and replace transactions.

A percentage of ABI system rejects is provided. This figure is derived from the number of ABI system rejected entry summary transactions as compared to the total number of entry summary transactions submitted through ABI. Entry summary transactions that generate warning messages are not considered to be system rejects.

Record Identifier 01/2/3 (Output)					
Data Element	Length/ Class	Position	Status	Description	Note
Control Identifier	1A	1	M	Must always equal O.	
Record Type	1N	2	M	A code representing the record type. Record Type Codes are produced in the following order and are: 1 = Current month 2 = Previous month 3 = Fiscal Year to date	
District/Port Code	4N	3-6	M	A code representing the district/port code where the entry summaries were filed. Valid district/port codes can be queries through the Extract Reference File chapter of this document.	
Entry Summary Volume (Formal)	7N	7-13	M	The volume of formal entry summaries filed with CBP.	
Entry Summary Volume (Informal)	7N	14-20	M	The volume of informal entry summaries filed with CBP.	
Total Entry Summary Volume	8N	21-28	M	The total formal and informal entry summaries filed with CBP.	
Total ABI Entry Summary Volume	8N	29-36	M	The total formal and informal entry summaries filed via ABI.	

Customs and Trade Automated Interface Requirements

Record Identifier 01/2/3 (Output)					
Data Element	Length/ Class	Position	Status	Description	Note
Percent Formal Entry Summary Volume Eligible for ABI	3N	37-39	M	The percentage of formal entry summaries filed that ABI is capable of accepting as compared to total informal entry summaries filed.	
Percent Informal Entry Summary Volume Eligible for ABI	3N	40-42	M	The percentage of informal entry summaries filed that ABI is capable of accepting as compared to total informal entry summaries filed.	
Percent Formal Entry Summaries Sent ABI	3N	43-45	M	The percentage of formal entry summaries filed via ABI as compared to the total that were eligible for ABI filing.	
Performance Warning Flag	1AN	46	C	An asterisk (*) in this data field indicates that volumes filed through ABI fall below acceptable performance standards (less than 90% ABI filed). Otherwise, it is space filled.	
Percent Eligible Informal Entry Summaries Sent ABI	3N	47-49	M	The percentage of informal entry summaries filed via ABI compared to the total that were eligible for ABI filing (including adds, replaces and deletes).	
Performance Warning Flag	1AN	50	C	An asterisk (*) in this data field indicates that volumes filed through ABI fall below acceptable performance standards (less than 90% ABI filed). Otherwise, it is space filled.	
Total ABI Entry Summary Transactions	8N	51-58	M	Total entry summary transactions sent through ABI (including adds, replaces, and deletes).	
Percent ABI Entry Summary Transaction System Rejects	3N	59-61	M	Percentage of system rejects as compared to the total number of ABI entry summary transactions (including adds, replaces, and deletes). Warning messages are not included.	
Performance Warning Flag	1AN	62	C	An asterisk (*) in this data field indicates that the total system rejects exceeds the acceptable level (greater than a 10% reject rate). Otherwise, it is space filled.	
Performance Warning Message	17A	63-79	C	If positions 46, 50 and/or 62 contain an asterisk (*), the message PERFORMANCE ALERT is system generated. Contact your client representative if this message is received	
Filler	1AN	80	M	Space fill.
